Communication

Good communication skills, fluent in English.
Can communicate in English, Hindi and Marathi.

Projects

- Developed a social web application in PHP as prime language, which is fully functional and user-friendly UI.

  Here in this project named 'tweet tweet quack quack' in which you can create your account by signing-up and choose the fields you are interested to see, you can also upload your display picture whenever you want, you can only visit homepage when you are logged in, if you are not logged in you will come back to login page, you can post tweets, stories, quotes as well as photos. In tweet section you can also add hashtags, and search any tweet by their hashtags, you can see your other users and update your profile as well profile this web app is completely user-friendly, and offers an interactive interface to user.

- Developed a social web application just like 'QUORA' clone which is fully function and user friendly.

  Here in this project named 'SavyKnow' I created a kind of knowledge hub where users can create their own classroom by signing up and post their questions, they can also answer other questions as well, the answer which got most upvotes will be displayed at top and so on, one can also add comments to other's answers if they want, you can follow people you want, you can see your followers as well as your followings, while others cannot see that. You can also search a particular question you are looking for, and you can update your bio as well, it is completely user friendly and interactive.

- Developed a car-rush GAME in vanilla JAVASCRIPT in 10 days.

  This game is developed in pure vanilla JavaScript which uses arrow keys to run the car on the platform, once you hit the enemy car the game will get over and score will be displayed.

- Deployed two e-commerce standard WEBSITES for a fabric company and a NGO website for old age home.
  - www.lawanyaa.com
  - www.nalandasanstha.in

- Developed a 'MINI PARENTHESIS VALIDATOR' using DATA STRUCTURES with C, which checks parenthesis in a input expression, if the input expression does not having valid parenthesis it will warn the user.
